DETAILED ACTION

Drawings

1. New corrected drawings are required in this application because they are informal in nature. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 4-22, 24-40 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Fernandez et al. (USP 5,539,299). See figure 1, discloses a switch 55, with diode, 56, and batteries, 16.

Allowable Subject Matter

4. Claims 3 and 23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of

the base claim and any intervening claims. The primary reason for the objection of claims 3 and 23 is the feature of a cell protection circuit having a transistor connected in series with a current bypass device that is connected in parallel to a serially connected transistor and cell.
